"TAKE YE NO THOUGHT FOR THE MORROW"

is perhaps as much Scripture as some people now practice in their daily lives. The more sensible and practical folks do take a thought for the tomorrows, and plan for them. Not only the tomorrows, but the next weeks, next months, and next years.

These well grounded folks start and build regularly a savings account, just so that they will be ready to use some of that saved money in some future day of sunshine.

BON-TONE

Best for Disorders of

and Bowels

A person whose system is absorbing bowel poisons by being constipated, frequently suffers from headaches, poor digestion, loss of appetite, lack of energy, nervousness, dizzy spells, biliousness, tired and generally run down feeling, all of which is usually attributed to some other cause entirely.

Even those who realize that the trouble may be due to constipation, too often depend upon a mild laxative pill which causes some bowel action, but does not soften and remove the hardened accumulations. The consequences are that the real condition is not helped and the feeling of illness continues.

When Nature warns, take BON-TONE, which eliminates poisons from the intestinal tract.

Special Partnership Plan to Customers of the Central Maine Power Company October 22nd to November 5th

Beginning Tuesday, October 22, and continuing for 13 working days, unless stock is all sold before that time, the Central Maine Power Company will again offer, through its employees, a special partnership plan to its customers.

When a similar partnership plan was made last year of 3,000 shares, over 4,000 shares were sold in four days. The Campaign was closed before the allotted time and many orders were cancelled.

This year 5,000 shares of its PREFERRED STOCK \$6 DIVIDEND SERIES have been reserved exclusively for customers at the special terms of \$97 flat, with no accrued interest charges, purchasers from October 22 to November 5 receiving full interest from October 1. The yield at this price is better than 6.18 per cent.

Invest Your Savings in Your Home Town
Power Company

With common stocks or investments with a "kick" in them selling at prices that have discounted earnings for years to come, yielding dividends in most cases less than 4 per cent, it is extremely difficult to pick those which are due for a further rise.

At such a time the prudent and wise investor is looking for an investment that will not shrink in value and will

yield a large income. Conservative financial advisors are therefore recommending for a portion of investors funds, investments in underlying, fixed income producing stocks which have an opportunity to increase in value and pay a higher interest rate than the average common stock. Such an investment, we believe, is the PREFERRED STOCK \$6 DIVIDEND SERIES of the Central Maine Power Company.

Follow the Example of Banks
and Insurance Companies

Banks, insurance companies and investment trusts invest in the successful growing electric utility PREFERRED STOCKS. Many of these companies own ours. They invest only after the most careful consideration as to SAFETY, MARKETABILITY, YIELD, APPRECIATION IN VALUE.

Over 13,000 Maine investors already own the Preferred Stock of this company.

Can you afford to be less careful with your money?

Ask Any Employee for Details or Send In Coupon

We cannot give full details of the offer here. Beginning Tuesday, our employees will call upon as many of our customers as time permits. They cannot reach everyone before the allotted 5,000 shares are sold.

Make sure that you receive full details by asking any employee of this Company, or send in the coupon.

FRYEBURG
Fire in Dormitory
Ralph M. Larrabee, a sub-master at
Fryeburg Academy, was burned about the
face Sunday noon, while attempting to
extinguish a fire in the boys' dormitory.
Mr. Larrabee and one boy, who were
sole occupants of the building at that
time, heard an explosion on the third
floor and rushed up to learn the cause.
They found the flames were work-
ing out around the door of a closet which
was known to have been closed and locked
the last three days.
They attempted to extinguish the blaze
with a hand chemical and then water,
but it was necessary to call the fire de-
partment before the fire was completely
extinguished. In the meantime it had
worked its way through the roof in one
or two places, but the building was little
damaged otherwise. Water from the fire
hose thoroughly soaked the rest of the
structure.
Few personal belongings were destroyed
as the boys who were around town when
the fire started rushed to their rooms and
threw their clothing and other property
out the windows.
Two or three years ago a similar fire
occurred through defective wiring and it
is believed the same cause was responsible
for this blaze.
The loss has not been estimated, but it
is thought to be fully covered by insur-
ance.
